## Connect with Icom at IWCE 2021

**KIRKLAND, Wash. (September 2021)** – Connect with Icom at this year's International Wireless Communications Expo (IWCE). This four-day event will be a valuable resource for technical training as well as business partner development. The famous Las Vegas Convention Center's brand-new West Hall will be welcoming attendees in person for the conference from September 27-30<sup>th</sup>, and the exhibits will be accessible from September 29-30<sup>th</sup>, 2021. Icom (**booth 362**) will have on display our most popular public safety solutions, including the IP730D Series hybrid radio, the VE-PG4 RoIP gateway, and more.

The IP730D Series is a revolutionary hybrid radio that can transmit and receive LTE, IDAS™, and Analog signals to create nationwide coverage for your team, even on legacy systems. Wherever you need coverage, the IP730D Series is ready. Dual PTT buttons target transmissions that use LTE and IDAS/Analog, and Dual Receive allows IDAS/Analog and LTE at the same time. The Bridge function instantly relays LTE conversations to the IDAS group and vice versa via LTE signals.

Want to expand your organization's network? Icom's VE-PG4 is the perfect solution for your organization's interconnectivity needs. This single device has the ability to connect disparate protocols and joining them into one seamless network can save your organization time, infrastructure, money, and resources. Networks small or large, local or national, you can easily interconnect P25, LTE, IDAS, satellite radios, and even SIP phones. Comparable systems would require several additional devices, further complicated installation, more time, and be more costly.

IWCE is four days of cutting-edge education that focuses on industry trends, executive discussions, regulatory reviews, technical instruction, cybersecurity checks, and more. For more information on IWCE, visit their [website](#).

AIR. LAND. SEA.

Icom is known the world over for manufacturing the most innovative land mobile radios. In a world where technology is ever-evolving, Icom continues to stand the test of time with leading-edge forward-thinking. Radio users worldwide choose Icom for their legendary durability, quality, dependability, and ease of use.
